

Press Release
MoU Signing Ceremony
Between
Institute of Space Technology, Pakistan
and Hanyang University, South Korea
12th October, 2009

Institute of Space Technology (IST), a premier degree awarding institute established in 2002 by the Islamic Republic of Pakistan, signed a Memorandum of Understanding with Hanyang University, South Korea to collaborate in enhancing MS/PhD scholarship, Faculty exchange and R & D projects to be managed/executed jointly for sustainable development of both the nations. HEC played the catalytic role in bringing the two universities together for the purpose of enhancing collaboration to fuel the industrial research and production in different areas of engineering including Aerospace Science & Technology.

The MoU signing ceremony was held at HEC and was chaired by Dr Javaid R Laghari. Vice Chancellor of the IST, Engr Imran Rahman also attended the ceremony. He briefed the senior faculty members of both the universities and senior members and advisors of the HEC who attended the ceremony about the institute's goals and the way it plans to support the nation's aerospace and communication industry.

Hanyang University which is entering into collaboration with IST is poised to lead the development of Korea in the 21st century by becoming the best engineering university in the world. Hanyang is producing numerous specialists who are working as the backbone of the nation's industrialization and modernization.

The joint academic and research programs that IST is conducting in collaboration with renowned foreign universities and R & D organizations are bound to bring back advance knowledge and trained professionals to serve our country. This dynamism that is reflected through the conduct of such hi-value joint research and training activities is sure to have positive impact on the efforts of space technology education in the country.
